REFLECTIONS VS EXPECTATION

This presentation reflects on our journey in our last year in KPPN, facing lots of challenges and adapting to the environment. Also getting used to the syllabus acceleration.

Fahmi and
Emir

SEMESTER 1 - SCRATCH

OUR INITIAL THOUGHTS

FIRST IMPRESSIONS

We thought that Scratch is for kids and we thought it was very easy for people like us to easily learn about Scratch

Fahmi and
Emir

THE REALITY

Scratch is more complicated than we thought because of the underlying mechanics like managing multiple sprites, coordinating their interactions, and utilizing advanced features like broadcasting messages

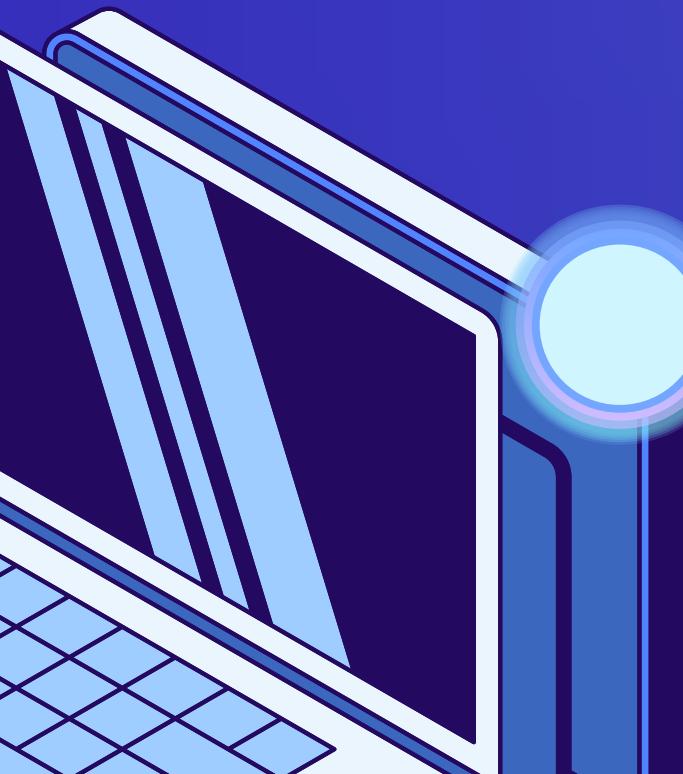

Fahmi and
Emir

WHAT'S THE RESULT OF THIS?

The lack of time because we underestimated Scratch
making us think it was a kids tool with many people
starting late to make their projects

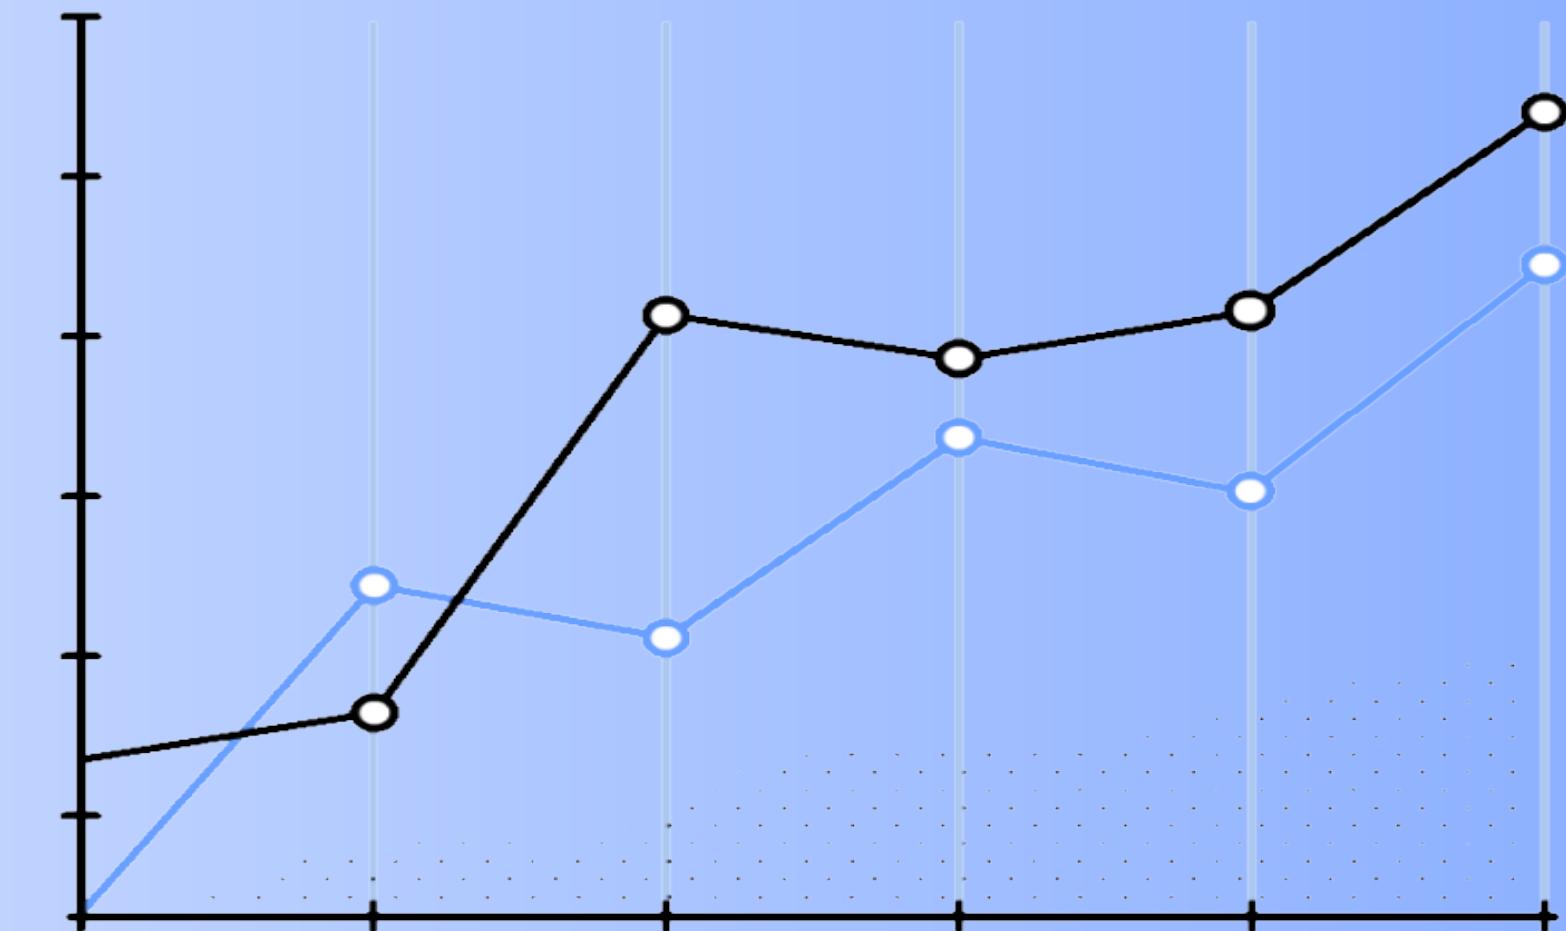

Fahmi and
Emir

WHAT WE LEARNED

Never underestimate anything
even it's a very simple thing
because something small can
even make a big changes.

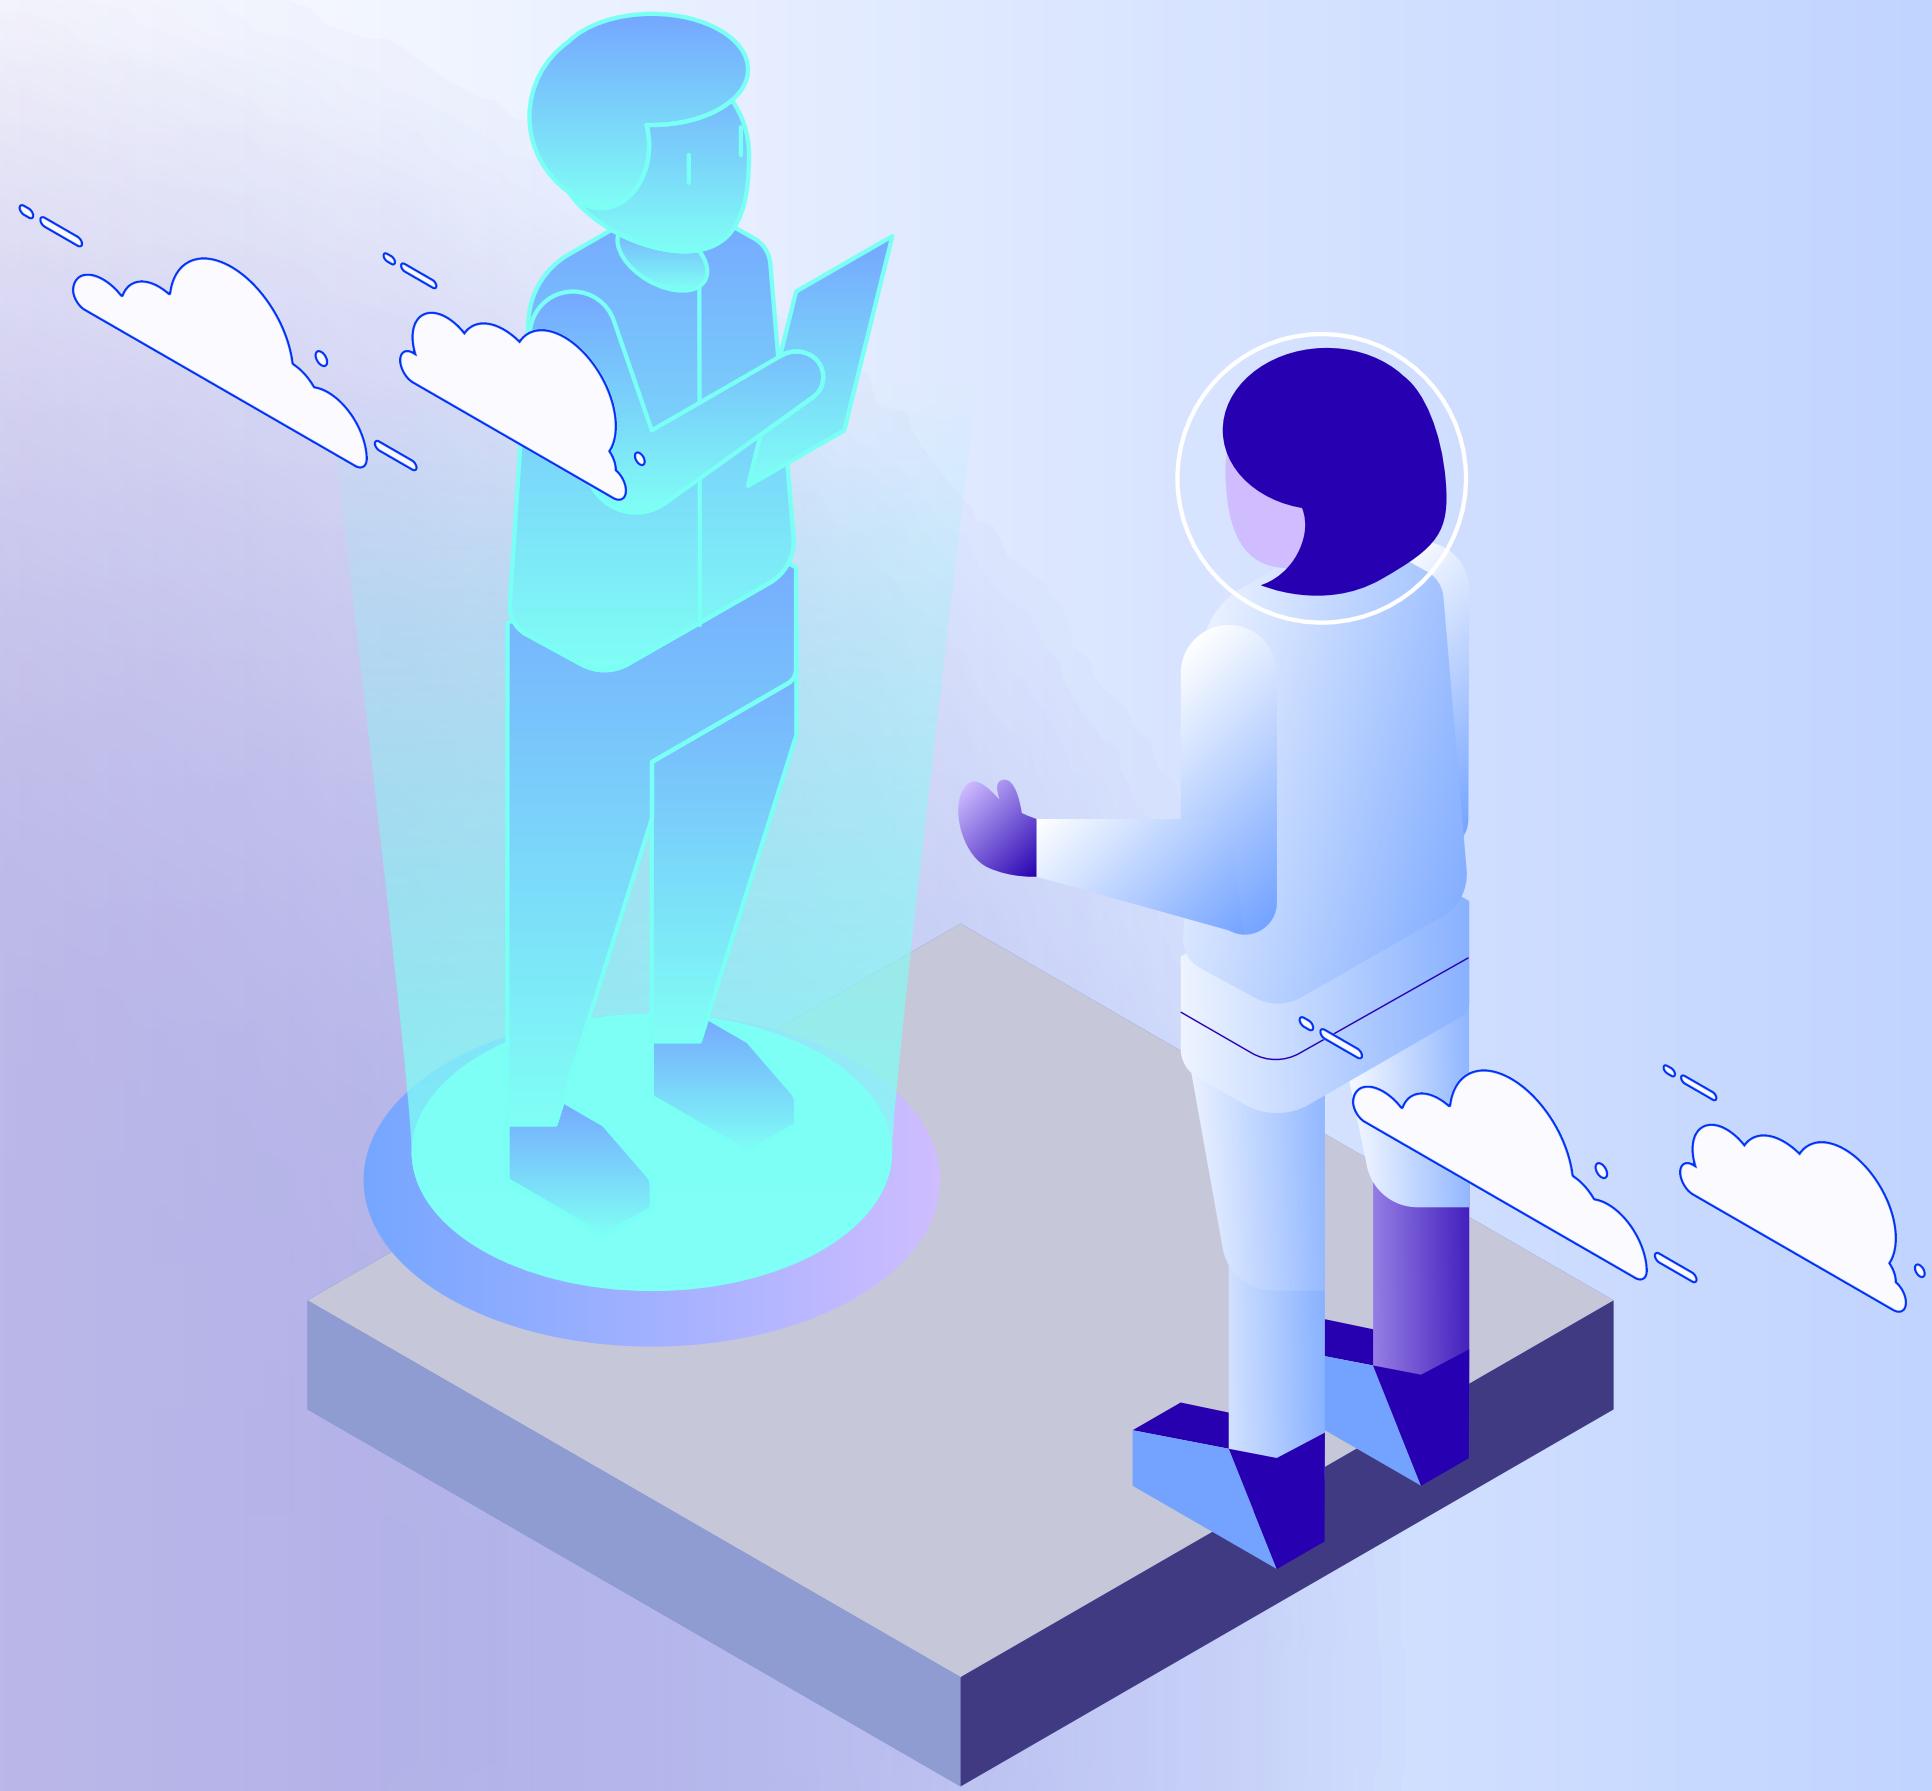

Fahmi and
Emir

SEM 2: DIVING INTO WEB DEVELOPMENT

FIRST IMPRESSIONS

It's going to be
hard...

Fahmi and
Emir

THE REALITY

It's not hard but not easy too as it's a patience thing

RESULT

We somehow manage to understand the coding languages

Fahmi and
Emir

WHAT WE LEARNED

Do the best you can until you
know better. Then when you
know better, do better.

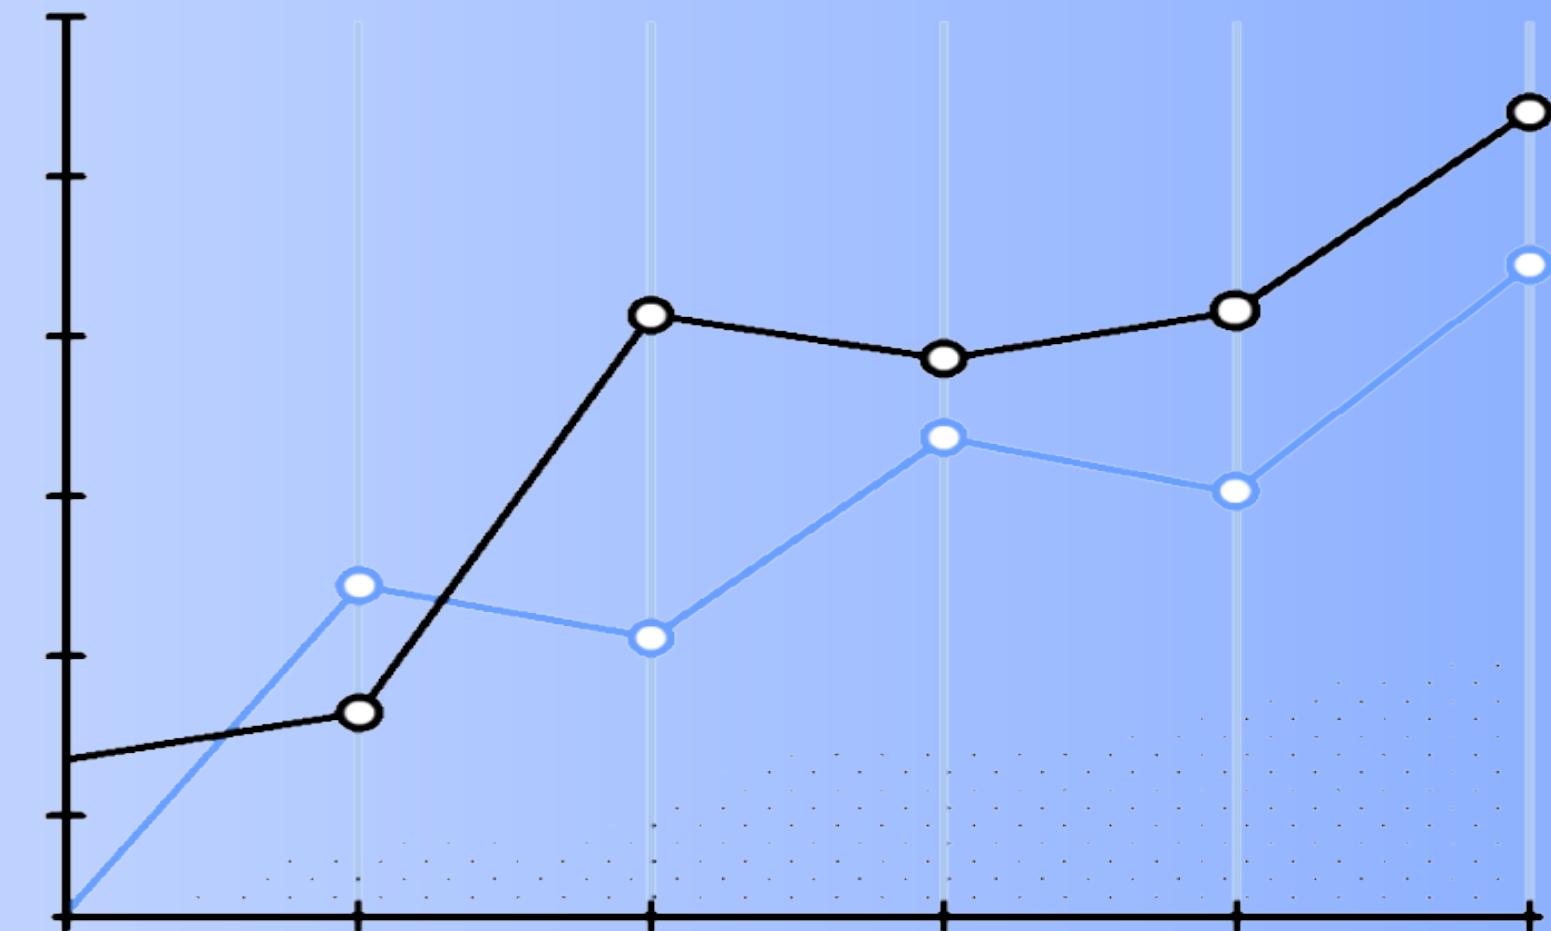

Liceria Tech

OUR EXPECTATIONS

To have a smooth flow of learning about things that we will learn for this year :D

And also to get an A+ on our PBL and Computer Science Subjects

Fahmi and
Emir

THANK YOU!
